 Fortaleza, Brazil

SUMMARY

Backend Developer with experience in mission-critical systems, including APIs for safety and maintenance control at a thermoelectric power plant with ISO and LGPD compliance. Core stack in NestJS, TypeScript, and relational databases. Familiar with the full chain: data modeling, authentication, Docker deployment, and production monitoring. Able to operate with a fullstack context when needed.

TECHNICAL SKILLS

Backend

Node.js, NestJS, TypeScript, Java, Spring, C#/.NET

Databases

MySQL, PostgreSQL, TypeORM

DevOps & Tools

Docker, Git, GitHub, GitHub Actions, AWS

Frontend

React, Next.js, React Native, Tailwind CSS

APIs & Security

REST APIs, JWT, OAuth, Swagger/OpenAPI

AI-Assisted Dev

GitHub Copilot, Cursor, Claude, Prompt Engineering, RAG

PROFESSIONAL EXPERIENCE

Web Developer

Energia Pecém — Largest thermoelectric power plant in Ceará

08/2024 - 01/2026

Fortaleza, Brazil

- Digitized 13 industrial safety forms (LOTO, confined space, work at height, welding, among others), replacing a fully paper-based process
- JWT authentication and authorization integrated with a legacy PHP system for multi-company access control
- Automated PDF report generation with Puppeteer, reducing generation time by 60%
- Automated job expiration for work permits to ensure operational safety compliance
- Audit log system integrated with Protheus and production monitoring via Grafana
- MySQL/TypeORM database modeling with ISO and LGPD compliance

Stack: NestJS, TypeScript, MySQL, TypeORM, Docker, JWT, AWS, Grafana, Puppeteer

Java Developer

Dataged — ECM/DMS solutions for public and private institutions

05/2023 - 06/2024

Fortaleza, Brazil

- Maintained internal Java/Spring system supporting core business operations
- Developed client-facing solutions from requirements gathering to delivery
- Bug fixing and feature implementation on legacy systems
- Reduced support tickets by ~15% through proactive system improvements

Stack: Java, Spring, Hibernate, SQL, HTML, CSS, JavaScript

FEATURED PROJECTS

SOC Dashboard

Cybersec

Red Team vs Blue Team platform. WAF with 18 regex patterns, IDS/IPS with threat intelligence, 136 automated attack payloads, and real-time SOC dashboard.

NestJS • PostgreSQL • React • Python

[GitHub](#)

UniMenu

Full-Stack + Mobile

Full restaurant ordering system. JWT authentication, Stripe payment integration, NestJS backend + React frontend + React Native app.

NestJS • React • React Native • MySQL

[GitHub](#)

FalaPai

Live PWA

Assistive communication app with natural voice synthesis via ElevenLabs API. Installable PWA with local persistence and drag & drop organization.

React 19 • Vite • Tailwind • ElevenLabs

falapai.vercel.app

Valvecraft

Educational Game

Interactive game for trumpet players to practice fingering and sight-reading in the browser. Rhythm engine with synchronized playhead, real audio synthesis (Tone.js), and sheet music rendering (VexFlow).

React 19 • TypeScript • Vite • Tone.js • VexFlow

valvecraft.vercel.app
